

- Purlins, Sheeting Rails and Eaves Beams rolled to order
- Mezzanine Floor Components
- Surebuild light gauge steel framing and structural walls
- Modular Building Components
- Laser Cutting, Punching and Notching
- Pre-Galvanised profiles up to 6mm thickness and 500mm in depth
- Grain and Bulk Storage Panels
- Bespoke Sections manufactured to clients individual requirements
- Extensive dedicated Fabrications and Paint shop Facilities

## BW Supports Jane Tomlinson's 'Run for All'

BW Industries have entered a team of 12 runners into the Jane Tomlinson's 'Run For All' Hull 10K race, to raise money for cancer charities. The team will complete the lengthy run during the Queens Jubilee Weekend on Sunday 3rd June, and will be looking for sponsors and donations in a bid to raise as much money as possible.

BW as a Company, have already donated £660 to the Jane Tomlinson cancer appeal when entering the team, and we would like to double this through outside sponsors.

Any donations are much appreciated, and can be made via the following:

1. Online at [www.justgiving.com/bwindustries](http://www.justgiving.com/bwindustries)
2. By texting **LPYE77** then the amount (i.e. £10) to **70070**

## Success of the Fabrication Shop

Since building our dedicated Fabrication and Paint Facilities in 2009, we have seen a vast increase in the amount of work we are producing. Welding materials from Mild Steel to Galvanised, with products from Gutter Sections through to products for Modular units, we are now busier than ever.

The main body of the work is the fabrication and assembly of Modular Units and Framing Panels, but we have all varieties of Bespoke work passing through.

For further information, please visit our website or contact a member of our sales team.

### WHAT'S NEW? ELECTRONIC DETAIL SHEETS

BW are in the process of designing electronic detail sheets, which will enable our customers to electronically complete and design the sections they require at the click of a button. We are constantly striving to improve our services for our customers, and we believe that these new detail sheets will be extremely time effective.

For more information on this, please contact a member of our dedicated sales team.

### TECHNICAL HANDBOOKS

We are currently working on various additional brochures for our product range. We already have technical handbooks for our Purlin Systems, and Mezzanine Ranges, but we are in the process of developing further brochures for our Modular Products, Framing Systems, Pressed Products and Fabrication Facilities.

### About SureBUILD technology

The material is steel, the technology is Surebuild. Lightweight, load bearing framework for all applications – industrial, commercial, modular and domestic. The Surebuild name reflects the ongoing product development, independent testing and analysis, manufacturing speed and accuracy, and overall cost effectiveness.

### Surebuild – solutions in steel

Surebuild is a registered Trademark of BW Industries Ltd.

B W INDUSTRIES LTD Carnaby Industrial Estate, Lancaster Road, Bridlington. YO15 3QY.

## BW Industries are pleased to announce their key involvement in the provision of fully assembled steel modules for the modular industry supplying into the fast food and retail sectors.

BW are in an ideal position to supply these buildings due to their wide range of cold rolled galvanised steel sections and the extensive fabrication facilities at the BW factory facility at Carnaby, near Bridlington in East Yorkshire.

Each module required for the restaurant buildings comprises floor and roof beams, and hot rolled end frames including temporary columns where necessary.

BW's contract is to manufacture all components, assemble into individual frames, and then construct each module into a full cube. Once the modules are ready lined and levelled, work can begin to fit out each module with the restaurant's kitchen, crew, and customer facilities.

On factory completion, the modules are then transported individually to the intended site location within the UK, and connected together into one whole restaurant building.
