

- Purlins, Sheeting Rails and Eaves Beams rolled to order
- Mezzanine Floor Components
- Surebuild light gauge steel framing and structural walls
- Modular Building Components
- Laser Cutting, Punching and Notching
- Pre-Galvanised profiles up to 6mm thickness and 500mm in depth
- Grain and Bulk Storage Panels
- Bespoke Sections manufactured to clients individual requirements
- Extensive dedicated Fabrications and Paint shop Facilities

BW New Drilling Line

BW Industries have recently installed a new Excalibur CNC Drill Line. This brand new machine provides high productivity due to its incredible versatility, whilst maintaining accuracy and precision.

Suspended and moving along its loading table, this machine offers speed and flexibility in punching and drilling a myriad of holes, from flange and web to slotted and countersunk holes.

Automatic sequencing from one section to the next, optional scribing and no manual programming puts this machine at the front of drilling technology.

We continue to invest in providing innovative product solutions with value added benefits, and pride ourselves in maintaining fast lead times, high quality products and competitive prices.

BW's Running Success!

The typical British weather of summer showers did not deter our 12 strong team of completing the Jane Tomlinson's 10K Run for All. The entire team completed the race, and BW's fastest runner finished in an impressive 43 minutes.

We would like to offer a big thank you to all those who have sponsored and supported us and we are proud to announce that we raised a total of £3423.95, which more than passed our target and expectations.

All the money raised has been donated to cancer charities.

WHAT'S NEW? BUILDING WIZARD SOFTWARE

The latest updated version of our Building Wizard Software V1.9.1.11 is now available to download from our website www.bw-industries.co.uk. Alternatively, a hard copy is available on request from a member of our sales team.

BW AUDIT 2012

We are pleased to announce that once again, we have passed our annual audit with flying colours. This reflects the staff's continued dedication and hard work and shows the development of the company and how we continually expand, and progress.

About SureBUILD technology

The material is steel, the technology is Surebuild. Lightweight, load bearing framework for all applications – industrial, commercial, modular and domestic. The Surebuild name reflects the ongoing product development, independent testing and analysis, manufacturing speed and accuracy, and overall cost effectiveness.

Surebuild – solutions in steel

Surebuild is a registered Trademark of BW Industries Ltd.

B W INDUSTRIES LTD Carnaby Industrial Estate,
Lancaster Road, Bridlington. YO15 3QY.

BW Industries were commissioned to design, detail and manufacture steel sections for the Millennium Stables development at Newmarket.

The project comprises provision of 80 stables arranged in courtyard and American Barn accommodation with provision of ancillary 60m by 30m horse exercise ménage, horse travelator and hay barn.

All of the structural members were made from cold formed pre-galvanised steel sections with many of the wall panels being constructed using the Surebuild system components. The lateral load capacity of the wall panels is superior to that of traditional masonry panels used in similar projects.

The American Barns were to be fitted with large sliding doors which were to be clad with a bamboo sheathing. BW Industries designed and manufactured the doors using similar components to those used to form the building wall panels.

The accuracy of manufacture of the building components ensured that the erection process was straightforward and that all parts fitted together correctly.
